## **Career Objective**

Enthusiastic recent engineering graduate with hands-on experience in technical support and software applications, seeking an Associate Technical Support Engineer (Application-Based Support) role. Adept at troubleshooting software solutions, managing databases, and providing remote support. Passionate about enhancing operational efficiency through technology-driven solutions.

---

## **Professional Experience**

Vigilant Technologies – Hyderabad, India

Associate Technical Support Engineer (ACTA) | Sep 2024 – Mar 2025

- Providing technical support for Access Control and Time-Attendance Solutions (ACTA) through remote calls.
  - Worked extensively with Matrix Telecom and Security software to resolve biometric support issues.
  - Managed backend data storage and retrieval using MSSQL and executed queries on SSMS (SQL Server Management Studio) for data management and troubleshooting.
  - Assisted clients with system integrations, troubleshooting, and ensuring seamless software performance.
- 

## **Education**

- Bachelor of Technology in Electronics and Communication Engineering  
Malla Reddy College of Engineering and Technology, Hyderabad, India  
CGPA: 7.24 | June 2024
  - Telangana Board of Intermediate Education – MPC  
Narayana Junior College, Hyderabad, India  
Percentage: 83.8 | June 2020
  - Telangana Board of Secondary Education  
Narayana Concept High School, Hyderabad, India  
CGPA: 8.3 | April 2018
-

## Technical Skills

- Programming Languages: Python, HTML, CSS, JavaScript, React.js
  - Tools & Technologies: Google Colab, Visual Studio, MS Office Suite, Power BI
  - Databases: MySQL, MSSQL (SQL Server)
  - Version Control: Git, Git Bash
  - Soft Skills: Technical Writing, Presentation Skills, Team Collaboration, Problem Solving, Time Management, Communication Skills, Adaptability
- 

## Certifications

- Introduction to Data Science – IBM
  - Machine Learning Model Deployment Using Flask – Great Learning
  - Data Analysis with Python – IBM
  - Data Visualization with Python – IBM
  - Communication & Interview Skills – TCS iON
- 

## Projects

### Find My Kraft (Dec 2023 – March 2024)

- Built a job search website using React.js and Node.js that helps people find jobs based on their skills
- Implemented NLP-based search to enhance user experience based on search history and job location.

### Omni Health Explorer (Jun 2023 – Aug 2023)

- Created a health checker app using Python that can predict if someone might have diabetes or heart problems.
- Built the entire web interface in Python and deployed it on Streamlit to run smoothly online.
- Trained the model using machine learning to make accurate health predictions.

### Music Recommendation System (Mar 2023 – May 2023)

- Built a music app that reads facial expressions to detect emotions and suggests matching songs from Spotify's database
- Used the computer's camera to detect emotions and match them with the right music mood.

### E-Commerce Website (Dec 2022 – Feb 2023)

- Developed an E-commerce platform using HTML, CSS, JavaScript.
- Integrated MySQL to store user details like email, name, phone number, and password. Added features for users to create accounts and browse products
